

Preparing to **LIVE STREAM**

(in 6 simple steps)

1

Open DirectorView™ app

Open the DirectorView™ mobile app on your camera. Sign in with your camera ID. Now, sign in to the app on your own phone, tablet or computer, using your email address, to test and control live stream.

2

Set up tripod and attach camera mount

Loosen the blue twist locks to extend tripod legs to maximum length. Re-tighten twist locks. Slide off quick release plate from tripod head, screw on and tighten magnetic camera mount, slide back onto tripod.

3

Connect cables to camera

Connect grey end of curly cable to grey adapter, then insert USB-C end of adapter into camera's USB-C port. Connect black end of curly cable to black mic receiver (with screen).

4

Position wireless microphones

Turn on receiver and two wireless mics. Attach first mic to podium microphone and position second mic 3 ft. from a loudspeaker in room.

5

Check video framing and test audio

In camera app, tap on desired stream, then tap Live Stream. Ensure vertical line(s) in centre of video are parallel with sides of frame. Tap music note button (bottom right) OFF, then ON. Check audio quality.

6

Go Live!

Using the Director panel (in Foveo.app) or DirectorView™ mobile app, tap on 'Go Live' to start the live stream broadcast for guests. You can also monitor and control the live stream remotely with the app.
