

FUNERAL STREAMING WITH MEVO CAMERAS

It's easy to connect and stream with a Mevo cam.

Simply add Foveo as a custom RTMP Streaming Destination in your Mevo app ([see instructions](#)).

You'll find your Stream URL and Stream Key at foveo.app, under Streams > IP Cameras.

Click on your Camera's name or +Create a new one, and enter the RTMP URL and Key in your Mevo app. You're all set!

When you're ready to live stream, tap on the new Foveo RTMP button in Mevo and then tap "Go Live".

Now, in Foveo's DirectorView™ app or in the Director panel (foveo.app), tap "Go Live" to start your broadcast for guests.
